

Mike Wilson

Chief Executive Officer

Consolidated Chassis Management (CCM)

Consolidated Intermodal Technologies (CIT)

Speaking Topics

- Trends in chassis provisioning and evolving marketplace needs
- SACP 3.0 chassis pool: Benefits of utility model on Southeast cargo flow
- Chassis fleet management platform/technology
- Industry and market leadership commentary

Biography

As CEO of Consolidated Chassis Management (CCM), the leading cooperative chassis pool manager in the U.S., and Consolidated Intermodal Technologies (CIT), a leading fleet management platform, Mike Wilson is responsible for overseeing all corporate operations and setting the company's strategic direction for the business, which is evolving and moving into new areas of the industry under his leadership.

With more than 45-years in international shipping, Mr. Wilson has the experience, knowledge and leadership required to guide CCM as it continuously evolves to meet the needs of the industry. He is transporting CCM to the next level, preparing for future growth, which includes the recent launch of the new South Atlantic Chassis Pool (SACP 3.0) and expanding into sectors of the industry that leverage his experience in chassis provisioning and fleet management.

He has held senior positions in logistics, operations, and customer service across North America, Europe, Central America, the Caribbean, and South America. Notable companies he has worked with include United States Lines, Crowley Maritime, United Arab Shipping, and Atlantic Container Line. Prior to joining CCM, he served as the SVP of Hamburg Süd North America, overseeing various departments.

Mr. Wilson is a past Board Member and past Chairman of the Intermodal Association of North America (IANA). In addition, he is a past Board Member of the New York Shipping Association, has been an active member on the NY/NJ Council on Port Performance and has served on the FMC's Supply Chain Innovation Team.

About CCM & CIT

[CCM](#) is the leading cooperative chassis pool manager, managing the fleet of approximately 70,000 chassis, with a mission to provide high quality equipment fleet management services to the intermodal marketplace. It operates the most efficient and effective chassis provision model for all stakeholders, as well as offering state-of-the-art IT Solutions and Fleet Management Services allowing CCM to effectively collaborate with steamship lines, railroads, ports, beneficial cargo owners and motor carriers at over 140 locations.

[CIT](#) is an innovative asset optimization platform that improves efficiency, productivity, visibility, workflows, and processes while cutting costs and eliminating redundancies. For over a decade, the CIT platform has been the backbone of CCM's fleet optimization system.
