Cloud Logistics by E2open has Been Selected as an Inbound Logistics Top 100 Logistics IT Provider for 2019

ATLANTA —May 8, 2019 — Cloud Logistics by E2open (Cloud Logistics), a leading innovator and provider of modern, easy-to-use transportation management systems (TMS), was chosen by Inbound Logistics as a Top 100 Logistics IT Provider for 2019. Selected from a landscape of more than 400 companies, Cloud Logistics has been recognized for providing an innovative TMS that increases visibility and productivity while reducing costs and complexity.

"We are delighted to be recognized for the seventh year in a row by Inbound Logistics as one of its top 100 logistics IT providers," says Mark Nix, senior vice president of transportation and founder of Cloud Logistics. "As an innovative solution provider for global shipping coordination and execution, Cloud Logistics is dedicated to disrupting the standard supply chain industry through revolutionary automation efficiencies, accompanied by affordable pricing. We designed our solution to be as easy to use as your favorite social media platform, which is just one of the reasons we call it TMS Made Easy™."

Each year, Inbound Logistics develops a list of the top 100 logistics IT companies that support and enable logistics excellence. Value is placed on providers who offer solutions that are central to solving transportation, logistics and supply chain challenges, and whose customer successes are well documented.

About Cloud Logistics by E2open
Cloud Logistics by E2open (Cloud Logistics) provides innovative and easy-to-use technology that powers transportation logistics solutions for the global supply chain market. Cloud Logistics' TMS offers a modern, intuitive user experience to simplify carrier selection, load tendering, communication and payment while increasing visibility and offering real-time reporting. The cloud-based tool is easy to implement and offers a rapid-deployment TMS that can go live in as little as one day. Cloud Logistics makes the complexities of order collaboration, communication and international transportation

management simple and beneficial for companies of any size. The TMS includes a unique user experience, customizable alerts, social technology for business and a mobile application designed specifically for carriers. For more information about Cloud Logistics, please visit www.gocloudlogistics.com.

About E2open
At E2open, we're creating a more connected, intelligent supply chain. It starts with sensing and responding to real-time demand, supply and delivery constraints. Bringing together data from customers, distribution channels, suppliers, contract manufacturers and logistics partners, our collaborative and agile supply chain platform enables companies to use data in real time, with artificial intelligence and machine learning to drive smarter decisions. All of this complex information is delivered in a single view that encompasses your demand, supply and logistics ecosystems. E2open is changing everything. Demand. Supply. Delivered. Visit www.e2open.com.
